THE PRESIDENT'S REPORT A.Y. 2018-2019

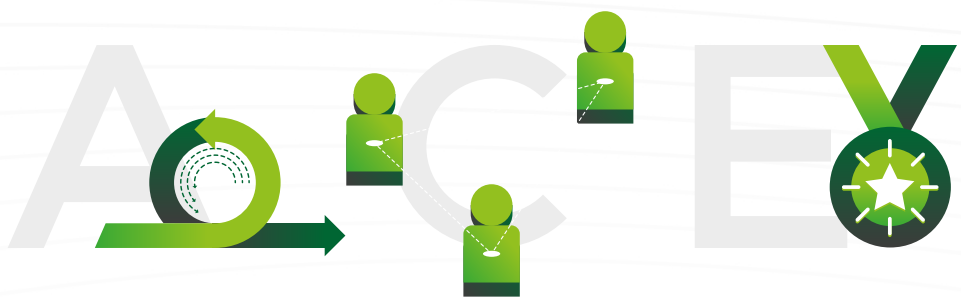
Introduction

As the world is being swept by the tsunami of technologies of the Fourth Industrial Revolution or Industry 4.0, countries, businesses, and organizations are turning to the education sector to develop graduates highly trained to face these global challenges. In the Philippines, schools have to contend not only with this challenge but also with the daunting operational and curricular changes brought about by the full implementation of the K-12 system three years ago.

In this context, De La Salle University continues to transform herself as a community of learners and educators. In crafting our four-year strategic plan, AY 2018-2022, we identified three themes or guideposts, which providentially form the acronym **ACE: Agility, Connectedness, and Excellence.**

Agility, or the ability to think or move quickly and easily, enables us to respond to the challenges of post K-12 education and Industry 4.0. On the transcendent plane, we also aim to discover the presence of God in our present realities, and respond with a spirit of faith. **Connectedness** allows us to be in touch with each other and our partners, in order to make our services more effective and seamless. As we build relationships, we experience genuine Lasallian communion in mission. **Excellence** underscores our passion to provide quality education, research, and engagement to our stakeholders. Ultimately, it manifests our Lasallian zeal for service.



The President’s Message

The President's Message

ACE PERFORMANCE

I am delighted to report that in Academic Year 2018-2019, we were fueled by agility, connectedness, and excellence as we sought to meet the targets in our key result areas. During the period, we underwent regular assessments at both the national and international levels. The Federation of Accrediting Agencies of the Philippines (FAAP), through the Philippine Accrediting Association of Schools, Colleges and Universities (PAASCU), granted a five-year Level III reaccreditation status for six undergraduate programs, namely, Accountancy, Business, Economics, Liberal Arts, Science, and Computer Science. Graduate programs were also assessed, with the Master of Business Administration and Doctor of Business Administration being conferred Level I status, valid until November 2020.

Scroll up and down to reveal more text

In the field of engineering, we received our ABET (Association of Boards of Engineering and Technology) accreditation for all our engineering programs. Likewise, the Philippine Technological Council-Accreditation and Certification Board for Engineering and Technology (PTC-ACBET) gave a two-year accreditation to the departments of Chemical Engineering, Civil Engineering, Computer Engineering, Electronics Engineering, Industrial Engineering, and Mechanical Engineering, valid until AY 2019-2020.

Meanwhile, in the 2019 Times Higher Education (THE) World University Rankings, DLSU was included among the Top 3% of higher education institutions (HEIs) worldwide. We were the only Philippine private university to be included in the list, as well as in: the 2019 Emerging Economies University Rankings, the Asia Pacific University Rankings, and Asia University Rankings. In addition, the University is the country's top-ranked institution in the Engineering and Technology Subject Rankings and the lone Philippine HEI to be included in the Impact Rankings.

AGILITY

The future requires us to be bold in our vision, quick and innovative in our response. Thus, despite the challenges of the academic shift to the K-12 system and of Industry 4.0, we continued to invest in state-of-the-art facilities to support our vision-mission as a leading resource for God and country.

In terms of infrastructure development, we inaugurated three research buildings on our Laguna campus as part of our efforts to make it a regional hub for science and technology. These are:

- the John Gokongwei, Jr. Innovation Center, a four-storey facility that now houses the Philippine studio of international gaming giant, Ubisoft;

- the Richard L. Lee Engineering and Technology Block, serves as a hub for DLSU's engineering programs; and,

- the George S.K. Ty Advanced Instrumentation Building, which features lab spaces with high precision instruments intended for experiments and lab work in the field of human biology, biology, chemistry and biochemistry, physics, industrial engineering, and industrial ecology.

We also launched the newest learning facilities on our Manila campus: the Emilio C. Yap, Jr. Case Rooms at the St. La Salle Hall, the Gokongwei Hall Digital Learning Spaces, and the Research Commons at the second floor of the Br. Andrew Gonzalez Hall.

In time for the start of classes in AY 2018-2019, DLSU Laguna Campus partner Arthaland Corporation opened the first cluster of its residential halls, which housed an initial group of 56 students from our senior high and college levels. In Manila, the University inaugurated a four-storey structure as dormitory for female athletes. The place has a total of 100 beds and features a dining hall, study area, a prayer room, and a vertical garden, among others.

CONNECTEDNESS

The rapid creation and development of new technologies has broken down global barriers. In today's borderless society, our people must be able to adapt to a dynamic, ever-shifting, technologically-driven environment. To help Lasallians develop the spirit of connectedness, DLSU jumpstarted programs that are multidisciplinary and collaborative.

One of these initiatives is AnimoSpace, DLSU's new learning management system that is used by more than 3,000 universities and educational institutions around the world and utilizes the best features of Canvas. This cross-platform learning space was chosen because it opens more opportunities for faculty and students to interact in new modes of teaching and learning.

The Faculty Manual 2018, an essential reference for faculty practices, was finalized through the collective efforts of members of the Lasallian community. The Technical Panel that updated the manual was composed of administrators and faculty members, represented by the Association of Faculty and Educators of DLSU, Inc. (AFED, formerly known as the Faculty Association). It was approved by the President and confirmed by our Board of Trustees.

Connectedness was emphasized not just within but also outside the Lasallian community, as we continued to engage with external partners and communities. DLSU pursued projects in line with the UN Sustainable Development Goals (SDGs), through the various service learning initiatives of students and faculty, some of which received awards in the international scene.

We also strengthened our linkages with our international network. DLSU participated in 17 internationalization activities in the ASEAN region and eight other countries in Asia, Europe and North America.

In terms of responding to the future needs of industry, DLSU started the groundwork for the establishment of a logistics institute and a data science institute. Both institutes are envisioned to provide multidisciplinary programs, to be designed in close coordination with industry and business partners, and with experts in the field.

EXCELLENCE

As the worldwide Lasallian community commemorated the Founder's death tercentenary during this academic year, DLSU faculty members and students stayed faithful to the Lasallian mission as they affirmed their commitment to impassioned service and the relentless pursuit of excellence.

Faculty members, particularly from the fields of engineering, management, literature, history, social sciences, computer and information technology, biology, and chemistry, received recognition from national and international award-giving institutions for their achievements in research and teaching.

For their part, students continued to make their mark in various academic, non-academic, and sports engagements as they received awards for campus journalism, culture and arts, debate and communication, leadership, international relations, finance and accounting, engineering, math, and science, among others. They also brought honor to DLSU for their sterling performance in licensure examinations. In the board exams for CPA and Chemical Engineer in May 2019 and in the Civil Engineer board exam in November 2018, DLSU was ranked the No. 1 school in the country. The College of Law likewise marked a milestone as it produced its first Bar topnotcher, Kathrine Ting, who was ranked at 8th place..

In the UAAP, DLSU produced four champion teams and bagged the 2nd place overall championship. Lasallian athletes also shone in other national and international sports tournaments.

PURSUING ACE

In Term 1 of Academic Year 2018-2019, DLSU's enrollment figures showed a lower number of enrollees at 17,029 compared to AY 2017-2018's 17,191 and AY 2016-2017's 18,696. The figures could still be attributed to the impact of K-12, which required Grade 10 graduates to proceed to Senior High School rather than college. Consequently, AY 2018-2019 was another year when the University had to contend with the reduction of enrollment, revenue, faculty teaching loads, and operating and infrastructure funds. However due to the foresight of the Board of Trustees, excess funds during the pre-K-12 years had been set aside to help the university cope with these challenges.

Emboldened by the challenge to serve as a leader in educational innovation, DLSU started laying the foundation for its university-wide digital transformation initiative slated for Academic Year 2019-2020.

This transformation drive, dubbed as the BITUIN Project, aims to drastically improve information access, streamline organization processes, and enhance services for university stakeholders.

BITUIN, which stands for Banner Initiative to Transform, Unify, Integrate, and Navigate, is in response to the ever-changing needs and challenges inside and outside the classroom. BITUIN's flagship initiative the Enterprise Resource Planning (ERP) system is a three-year project to drastically improve financial management, human resources management, and student life cycle.

The BITUIN project committee, together with faculty members and personnel and industry consultants, determined the gaps and the "pain points" in the student lifecycle, financial lifecycle, and HR lifecycle. To address these, DLSU engaged with key partners for the said domains and identify solutions.

In summing up our work in Academic Year 2018-2019, we can say we have been blessed by Divine Providence. Despite the disruptions brought about by the sweeping tide of technological advances, social conflicts, and even natural calamities, we remain steadfast in our work, faithful to the legacy of our Founder, St. John Baptist de La Salle.

BR. RAYMUNDO B. SUPLIDO FSC
President
De La Salle University

Institutional Achievements

Institutional Achievements

With its thrust on lifelong learning and development, De La Salle University continued to take on a leading role in the academic sector with its regular assessment and accreditation initiatives. The University once again opened its doors to the Federation of Accrediting Agencies of the Philippines (FAAP) and the Philippine Accrediting Association of Schools, Colleges and Universities (PAASCU) to seek validation as well as points for improvements for its various undergraduate and graduate programs.

Likewise, DLSU received the successful results of its initial year of participation in the Association of Boards of Engineering and Technology (ABET) and Philippine Technological Council-Accreditation and Certification Board for Engineering and Technology (PTC-ACBET) assessments for its engineering programs.

Academics

Academics

DLSU strengthened its connections with higher education institutions (HEIs) across the country, bringing together teacher-researchers and education administrators and serving as a hub of education innovation. Faculty members engaged in collaborative, multidisciplinary research and service learning programs in pursuit of sustainable development. They also started the groundwork for the development of new programs in logistics and data science, while constantly updating their knowledge in their respective fields.

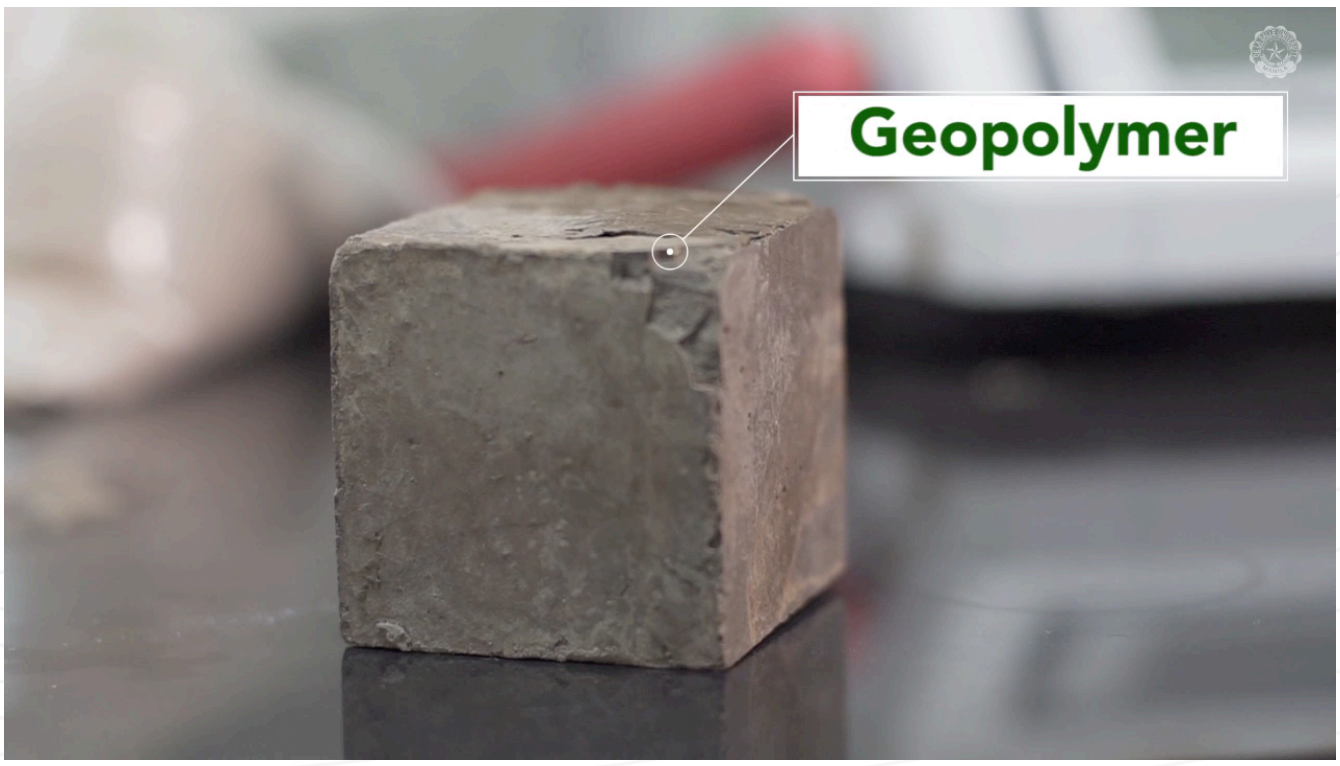
Research

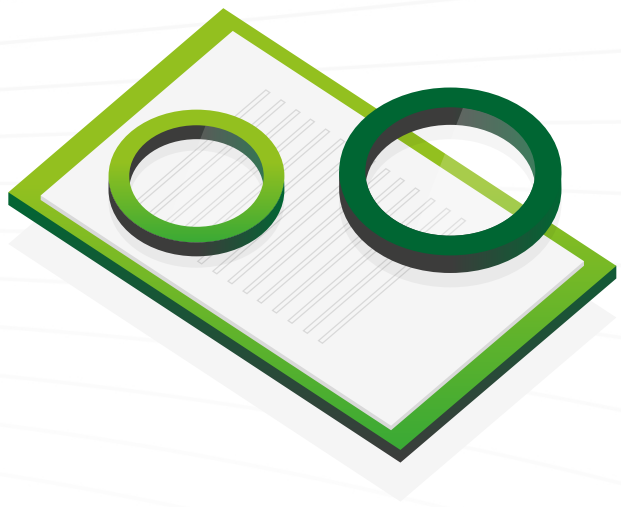
Research

In pursuit of the University's Excellence thrust, DLSU enterED the Times Higher Education World University Rankings for the first time, belonging to the top 3% of higher education institutions worldwide. The University is the only Philippine private institution to be included in the 2019 list, as well as in the 2019 Emerging Economies University Rankings, the Asia Pacific University Rankings, and Asia University Rankings. Moreover, the University is the country's top-ranked institution in the Engineering and Technology Subject Rankings and the lone Philippine HEI to be included in the Impact Rankings.

The THE Rankings list the world's leading research universities, requiring a threshold number of Scopus publications, combined with data on teaching, innovation, international outlook, and reputation.



Tap to play



A Physics professor conducting research at DLSU Laguna Campus develops an affordable nano gas sensor device that can provide an accurate and immediate diagnosis of lung diseases such as TB and cancer

The Ivatan tradition of constructing vahay (house) and tataya (boat) is slowly disappearing. A faculty team from DLSU seeks to preserve it through the Batanes Documentation Project.

Social Engagement

Social Engagement

Connectedness was emphasized not just within but also outside the Lasallian community, as the University continued to engage with external partners to create smart and sustainable communities. DLSU explored opportunities for collaboration in the areas of student formation, research, service learning, and social engagement, in line with the UN Sustainable Development Goals (SDGs).

Infrastructure Development

Infrastructure Development

The University inaugurated three research buildings on Laguna campus —the John L. Gokongwei Innovation Center, the Richard L. Lee Engineering and Technology Block, and the George S.K. Ty Advanced Instrumentation Building. New learning facilities were likewise launched on Manila campus: the Emilio C. Yap, Jr. Case Rooms, the Gokongwei Hall Digital Learning Spaces, and the Research Commons.

AnimoSpace, DLSU's new learning management system, was launched in AY 2018-2019 and was designed to open more opportunities for faculty and students to improve teaching and learning. It is a cross-platform learning space that utilizes the best features of Canvas, used by more than 3,000 universities and educational institutions around the world.

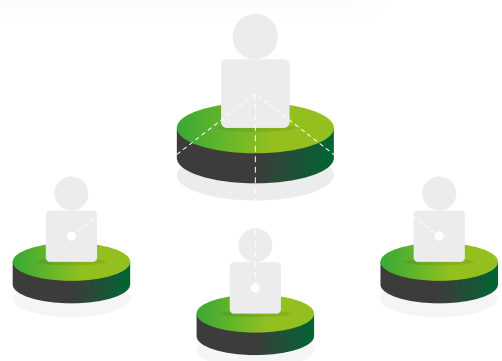
BITUIN
Banner Initiative to Transform, Unify, Integrate, and Navigate

ENTERPRISE RESOURCE PLANNING

De La Salle University is undergoing a digital transformation called the BITUIN Project. BITUIN stands for **Banner Initiative to Transform, Unify, Integrate, and Navigate.**

BITUIN's flagship initiative Enterprise Resource Planning (ERP) system is a three-year project involving financial management, human resources management, and student life cycle. It means rationalizing and improving access to information, streamlining processes so that they are most efficient to users, and enhancing services for all stakeholders and members of the academic community.

Academic Year 2018-2019 saw creation of the BITUIN project committee, which set the groundwork for this project. The committee worked closely in partnership with DLSU faculty members and personnel, as well as industry consultants.



DLSU President Br. Raymundo Suplido, in his 2019 University General Assembly message, said, “This will profoundly change how we facilitate learning, conduct our operations, and provide services to our stakeholders. Harnessing digital technology will allow us to maximize our resources and enable us to deliver quality education that befits our aspirations as a university of regional standing.”

He added: “Transformation is in our DNA as a Lasallian institution. It is rooted in DLSU’s mission to be a leading learner-centered and research university, and in response to the ever-changing needs and challenges inside and outside the classroom.”

During the initial stage of the project, the BITUIN project committee began to identify the gaps in the student lifecycle, the financial lifecycle, and the HR lifecycle. It also started drafting proposed solutions to address the limitations and challenges of the current processes.

2018 FACULTY MANUAL

A significant undertaking by the faculty and administration during Academic Year 2018-2019 was the revision of the Faculty Manual. To provide an updated guide and reference on University policies related to faculty development, a technical panel reviewed the existing manual to address gaps in procedures for hiring, promotion, and permanency.

The Technical Panel that updated the manual was composed of administrators and faculty members, as represented by the Association of Faculty and Educators of DLSU, Inc. (AFED, otherwise known as Faculty Association). It was approved by the President and confirmed by the Board of Trustees of DLSU. By the tail end of the academic year, Faculty Manual 2018 was finalized and produced.
